DETAILED ACTION

This application is a 371 of PCT/JP05/02388.

The preliminary amendment filed on August 11, 2006, amending claim 3, canceling claims 4-7, and amending the abstract, has been entered. Therefore, no new matter has been entered.

Claim 21 is pending and is under consideration.

Claim for Foreign Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statements (IDS) submitted on February 13, 2008 and April 19, 2007 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements are being considered by the examiner.

Specification

The abstract of the disclosure is objected to because the abstract is in two paragraphs. Correction is required. See MPEP § 608.01(b).

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: --Preventive and Therapeutic Agent Comprising Human Thioredoxin for Preventing or Treating Chronic Obstructive Pulmonary Disease--.

This application is a contains sequence disclosure that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825. To be in compliance, applicants are required to identify nucleotide sequences of at least 10 nucleotides and amino acid sequence of at least 4 amino acids in the specification by a proper sequence identifier, i.e. "SEQ ID NO:", see MPEP 2422.01). It is particularly noted that the sequences on page 6 lines 6-7 and 9, for example, lack sequence identification numbers.

Further, the speciation refers to "SEQ ID NO:1" and "SEQ ID NO:2" on page 6, but the application does not a paper copy of the Sequence Listing nor a computer readable file of a Sequence Listing. Therefore, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825. See the attached Notice to Comply.

Claim Rejections - 35 USC § 102

Art Unit: 1652

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 8-52 are rejected under 35 U.S.C. 102(b) as being anticipated by Hillman et al.

Claims 1-3 and 8-52 are drawn to a therapeutic agent containing a human thioredoxin, wherein said therapeutic agent is for the disease or condition recited in claims 1-3 and 8-28.

Hillman et al. (US Patent No. 5,831,049 – form PTO-892) discloses a therapeutic agent containing a human thioredoxin (abstract and Column 19, line 46 through Column 21, line 67). The limitation “for chronic obstructive pulmonary disease” of claim 1 and such limitations recited in claims 2-3 and 8-28 merely state the purpose or intended use of the invention, rather than any distinct definition of any of the claimed invention's limitations. Further, such intended use of a therapeutic agent containing a human thioredoxin does not result in a structural difference. Therefore, such limitations have not been given any patentable weight. Therefore, the reference of Hillman et al. anticipates claims 1-3 and 8-52.

Conclusion

Claims 1-3 and 8-52 are rejected.

No claim is allowed.
